Letter of Intent

At the Secondary School, I learned about programming and website development. One of the most important languages I learned was languages such as "Python , PHP , Laravel(PHP),javascript , node.js and more". Education was not limited only to programming languages. We learned the stages of programming and testing. I was assigned a lot of projects to apply to what was studied. There were individual projects and projects in conjunction with a team. Projects with a team developed a spirit of cooperation, engagement and leadership. and i want to take about turkey. Turkey is one of the most important Muslim countries that has developed itself and looked at education differently. Today, many students from all over the world want to learn in Turkey because of its competence and progress in the field of education and it has many efficient members that help in the development of education. And It has a distinctive group of internationally accredited universities and Europe and they are some of the best universities I dream and want to join. now what is my future plans Because learning in this field doesn't stop and every day there's something new coming out. There are many plans on how to develop myself by enrolling in the courses that is necessary to be ready to keep up with everything that is new in this field and to be ready to enter the labour market deservedly. And then you have to benefit as many sons as possible and teach them a lot about programming and what I've learned throughout my life and in this scholarship.

In this section, it is expected to explain following details: your academic and social experiences relating the field you want to take an education, your reasons for choosing Turkey for study and the importance of your future plans for your education and scholarship in Turkey.

There's nothing.

If you have a subject in your application documents that you think is not clear enough and you want to explain, or if you want to draw the attention of the evaluation committee, please briefly explain in this section.

Scholarship Programs

Soru : I hereby declare that I have fulfilled the requirements set out above and request that my application be assessed under the Merit Scholarship Programme.
